

// WELCOME TO BRITISH FIRES

At British Fires the design and development team has one mindset, uncompromising quality, which drives us to deliver top-end products. Our aim is to help you create a peaceful and relaxing environment.

// OPEN SUITE

Our Holbury Electric Suite begins a new chapter in the British Fires line of products. The sleek and modern construction features an open-fronted design that brings you closer to the flames. A chamfered edge design adds a touch of charm to the suite construction.

Choose between the classic white or contemporary grey marble-effect to be your finishing touch.

OPEN FRONT DESIGN

// MARBLE-EFFECT MDF

You won't believe it's not marble. By using a meticulous hand painting technique to create the marble-effect we are able to give the appearance of solid marble on a light but, sturdy MDF suite.

Our premium MDF is moisture resistant with an extra smooth finish and seamless design that allows us to paint the marble-effect onto the solid-frame units.

The MDF construction methods are eco-friendly and all materials are sustainably sourced.

AWARD WINNING LED FLAMES

// DELUXE REAL LOGS

The Holbury Suite comes with our Deluxe Real Logs.

Each Deluxe Real Log is unique and artisanally crafted using actual logs found in nature. They really enhance an already prominent statement piece in any room, taking any viewer by surprise. Especially, when you tell them that they are *real logs*.

The development process of the Deluxe Real Logs fuel bed begins by selecting different sized logs which are scorched and charred to add realness. Branches and twigs, along with the scorched logs are then arranged in a bespoke composition upon on a forest floor bed comprised of bark and log remnants.

Deluxe Log arrangements are bespoke and may differ from the images in this brochure and showroom displays.

- 🔥 **Natural logs responsibly sourced**
- 🔥 **Individually hand scorched**
- 🔥 **Each Deluxe Real Log fuel bed is fixed into place by hand for a slightly unique campfire style arrangement**

// REALISTIC FLAMES

Our LED flame-effect is the proud winner of the Home & Hearth *Art of Fire* award. The flames dance along the entire display behind the Deluxe Real Logs and glimmer in warm shades of red, orange and yellow. Adjust the flame height to low, medium, or high to suit the mood of the room.

Turn the downlights on to add another dimension to the fire. The campfire log setup will mirror onto the back glass giving the effect of the flames pirouetting between two sets of logs.

AWARD WINNING LED FLAMES

// BE IN CONTROL

The Holbury Suite is equipped with a remote control that bridges the connection between you and your fire. Each button displays an icon that clearly identifies the function to engage with the fire and explore the features.

Air Curtain Technology

The Air Curtain Technology® heater system is thermostatically controlled using the remote handset which displays the current setting on the LCD screen. Choose a temperature between 17° and 27°C and the fire will do the work to heat the room to your desired temperature.

AIR CURTAIN TECHNOLOGY® UK Patent Number: GB 2583055 B
EU Patent Number: 19215407.8

Open window detection

If there is a sudden drop in temperature of 5°C or more within a ten minute period, the heater will automatically turn off to preserve energy. Look out for the OP sign on the digital display to show this has been activated. The heater will start up again once the temperature in the room rises or you choose to manually turn it back on.

Down lighting

Select to have the carefully placed spot lights on and see every detail of the fire. Turn them off and you will see how relaxing the fuel bed can really be.

Fuel bed colour change

Cycle through all of the three colours that each provide a unique style. If you can't decide... the cycle setting will flow through all of the colours for you.

Timer boost

A range of settings between one and nine hours can be selected to turn the heater on for a desired length of time.

Flame control

Choose from four settings to adjust the brightness of the flame to suit your mood. Watch as the flames change brightness and height.

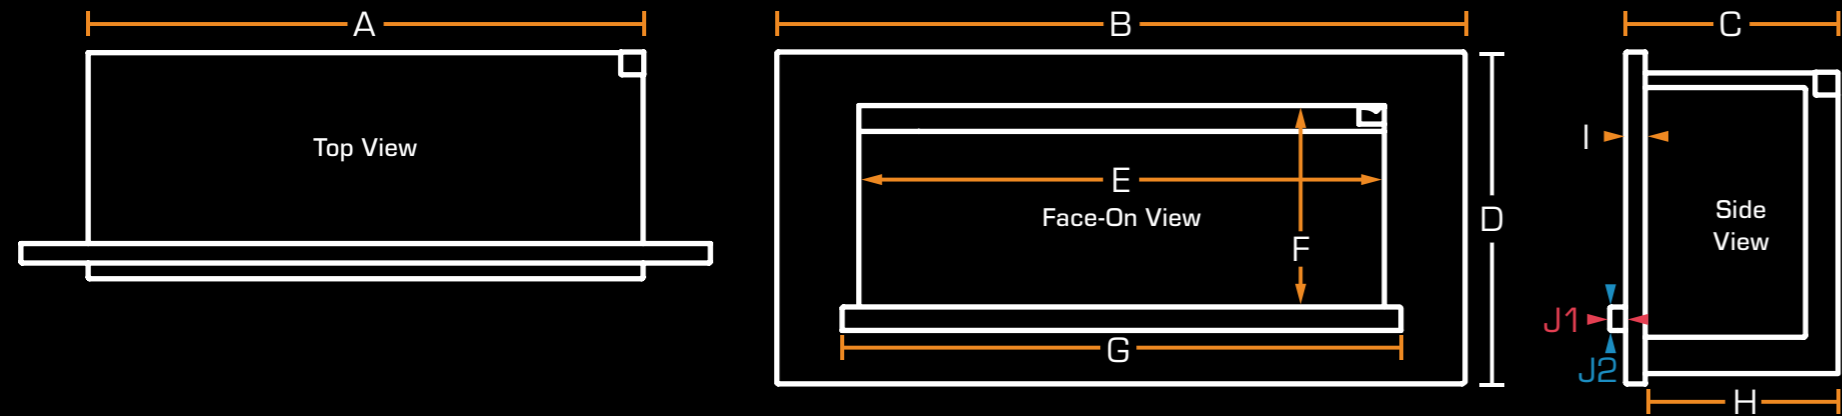

Daily and weekly timer

Set the fire to provide you with heat on any day throughout the week. The seven-day programmable calendar will remember your settings and will activate the thermostatic heater on each day and every week for when you need the New Forest fire the most.

AVAILABLE IN WHITE OR GREY MARBLE-EFFECT
